Alarm

Press **New** to edit an alarm: **Alarm name**, **Time**, **Repeat**, **Sound**, **Vibrate(Off/On)** and press **Save**.

Voice memos

This menu option enables you to set up tasks about which the telephone can remind you later. Accessing this menu option shows a list of tasks configured. The options enable you to add new tasks and edit/delete existing tasks.

If you add a new task or edit an existing task, enter **Subject**, **Remind sound**, **Due date**,

Due time, Repeat, Sound loop (default:10 times) and **Remind interval** (default: 5 mins).

You can use **Remind sound** to record what you want to be reminded instead of traditional input tasks.This will make elderly more easily to operate.

Remark:

1. When preset time is coming,the phone will play the recorded sound, and there is a pop-up of task with options: **Know** and **Repeat**. By pressing Know or End call key to exit the task.

2. Or in case the elderly people can't listen to this remind task in timely,by pressing **Repeat**,the phone will play the recorded sound again,and also several minutes later repeat the sound again basic on the interval time of **Remind interval**.

Magnifier

With the camera's magnifier, users can zoom in by adjusting the focus distance.

With this function, the elderly users can read the newspapers, magazines and other books more easily.

Remark: Press * or # to zoom out or zoom in the focus.

Social media

1. YouTube

- 1) Video sharing where you can watch, like, share, comment and upload your own videos.
- 2) Search for or watch video you like.

2. Browser

- 1) Visit websites and do activities within them like login, view multimedia, link from one site to another, visit one page from another.
- 2) Search things you like on Internet.

Remark: By using above social media base on the network connection like Mobile data, Wi-Fi.

3. Lite

If you have the Facebook account, just enter the Phone number or Email and Password to log in, so you can send the messages to your Facebook friend directly.

Multimedia

1. FM radio

- 1) Press left arrow  and right arrow  to adjust the channel lists;
- 2) Press **Options**, you will view **Auto search and save**, **Pause**(default)/**Play**, choose the action you need.
- 3) Press **Back** to **Quit** or **background play**.

2. Recorder

SOS

1. Make sure SOS **Enable** to work.
2. Scroll to **Emergency contacts** to setup SOS number, here you can setup 5 numbers.
3. Scroll to **Warning Tone** to control warning tone status **On** or **Off**.
4. Scroll to **Send message** to choose whether to send **SOS SMS** or not.
5. Scroll to **Emergency message** to edit SOS emergency message.

Make a SOS call

Before making a SOS call, please ensure SOS status is **Enable** and you have already finished SOS settings.

Then long press **SOS button** about 3 seconds, the phone will automatically send two messages of one SOS emergency and another positioning of Google link to the saved emergency contacts and then call the saved emergency contacts one by one, warning tone is always on until someone manually abort the SOS function.

Remarks:

1) There are 3 kinds of positioning: LBS(Location Base Station),Wi-Fi and GPS. LBS and Wi-Fi positioning are using indoor. GPS positioning is using outdoor.

The positioning accuracy:LBS about 200m,Wi-Fi about 20m,GPS about10m.

2) When SOS function activated,the phone will automatically turn on GPRS mobile data and connect to pre-stored Wi-Fi(if stored in phone in advance) for the purpose of more precise positioning.If not pre-stored Wi-Fi,the phone only turn on GPRS mobile data. While the SOS function is aborted,the phone will automatically turn off GPRS and/or Wi-Fi.

3) SOS function always requests the network(GPRS and/or Wi-Fi) to have the positioning, and sends out the message of Google link. If don't have network(GPRS), it will send the message"no network data,positioning failed" instead.

Warning!

The SOS function must be activated before use. For some interference factors (e.g. Internet, environment and etc.), SOS function is not available.
